User Guide

Your AI-powered sales assistant via Telegram

What is CRM Assistant?

CRM Assistant is your personal AI-powered sales companion that lives in Telegram. Just chat naturally about your leads, and the assistant will:

- Record new leads and update existing ones automatically
- Track partnerships and referral arrangements
- Send you follow-up reminders so no lead falls through the cracks
- Nudge you about leads that have gone quiet
- Give you strategic advice when you ask

How to Use It

Simply send a message to your Telegram bot. Talk naturally - the AI understands context and extracts the important details for you.

Adding a New Lead

Just tell the assistant about a new prospect. Include whatever details you have:

Example Message:

New lead: Ahmad from TechCorp Malaysia. Looking at AI chatbot for customer service. Budget around RM50k. Meeting scheduled for next Tuesday.

The assistant will automatically save the lead name, company, project scope, budget, meeting date, and any other details you mention.

Updating a Lead

Had a meeting or call? Just share the update:

Example Message:

Update TechCorp: Great meeting today! They loved the demo. Moving to proposal stage. Need to send quote by Friday. Follow up next Monday.

The assistant finds the existing lead by company or lead name and updates it with your new information.

Lead Stages

Mention any of these stages in your message and the lead will be updated accordingly:

Stage	What it means
Discovery	Initial conversations, understanding needs
Proposal	Preparing or sent a proposal/quote
Pilot	Running a trial or proof of concept
Legal	Contract review and negotiations
Won	Deal closed successfully!
Lost	Deal did not go through

Closing a Deal

When you win a deal, celebrate by telling the assistant:

Example Message:

Closed TechCorp! Final deal RM45k. Contract signed today.

Recording Partnerships

Have a referral partner or commission arrangement? The assistant tracks these too:

Example Message:

New partner: Dr. Assist clinic. They will refer AI projects to us. 10% commission on closed deals.

Asking for Help & Advice

Need strategy advice? Just ask! The assistant can review your pipeline and give suggestions:

Example Messages:

"Which leads should I focus on this week?" "Review my pipeline and suggest next steps"
"How should I handle the objection from ABC Corp?"

What Happens Automatically

Here is what the assistant does behind the scenes to keep you on track:

Daily Follow-up Reminders

Every day, the assistant checks for follow-ups due **tomorrow** and sends you a friendly reminder via Telegram.

This way, you always have a heads-up the day before a follow-up is due.

What you will see:

A Telegram message listing who needs follow-up tomorrow, with context about your last interaction.

Automatic Follow-up Dates

Did not set a follow-up date? No problem! The assistant creates one automatically based on the lead stage:

Stage	Auto Follow-up After
Legal	1 day
Proposal	2 days

Pilot	2 days
Discovery	3 days
Other / New	3 days

This runs every 3 days to ensure no lead is forgotten. If you set your own follow-up date, that takes priority.

Stale Lead Reminders

Every 4 days, the assistant checks for leads that have gone quiet - no updates for **5 or more days**.

You will get a friendly nudge via Telegram reminding you which leads need attention.

What you will see:

A warm, supportive message listing leads that have been quiet, with context about when you last updated them.

Quick Reference

Example Messages

What you want	What to say
Add new lead	"New lead: John from ABC Corp, interested in AI automation"
Update a lead	"Update ABC Corp: Had call today, moving to proposal"
Set follow-up	"ABC Corp - follow up next Wednesday"
Close a deal	"Closed ABC Corp! Deal value RM30k"
Add partner	"New partner: XYZ Consulting, 15% commission"
Get advice	"Which leads should I prioritize?"

Reminder Schedule

Reminder Type	When	What it checks
Daily Follow-ups	Every day	Follow-ups due tomorrow
Auto Follow-up Creation	Every 3 days	Leads without follow-up dates
Stale Lead Nudge	Every 4 days	Leads quiet for 5+ days

Tips for Best Results

1. Be specific with company names - this helps the assistant find existing leads accurately
2. Mention dates clearly - "next Tuesday" or "January 25" both work
3. Include the stage - "moving to proposal" helps track progress
4. Set your own follow-up dates - these take priority over auto-generated ones
5. Ask for help anytime - the assistant can review your pipeline and suggest priorities

Questions? Just ask your assistant!
